

Alle Table

by Staffan Holm

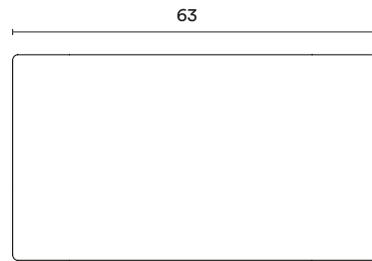

Inspired by simple Japanese wood-joining techniques he saw in Zen temples, Staffan Holm created Alle, a generously proportioned oak table that features his trademark mix of modernity and tradition. Alle's thin, rounded edges give an impression of lightness and elegance unusual for such large piece, while the legs attach to the table top via a continuous beam, eliminating the need for tools. Ideal for both the dining room or working space, Alle comes in either black or natural finish. The conference version features built-in compartments for media ports.
